DAYLED 1000

3200°K | 5600°K | DUAL COLOR

The DAYLED 1000 units are the revolutionary LED fixtures with Fresnel lens with high color rendering and high luminous efficiency.

Powered by a Powered of just 110W they generate a luminous output equivalent to approximately 1000W. The luminous intensity of the DAYLED 1000 can be adjusted by the local dimmer, placed on board the fixture or remotely via DMX control.

In the manual adjustment, the digital display built in the fixture allows to visualize the luminous intensity at which the light is set. The units can be powered by mains or with practical and compact Li-ion batteries with a long autonomy. The extreme lightweight (weight is just 3.5 kg), along with the possibility to be powered with battery, make them particularly suitable, besides the use in video and TV studios, to an outdoor usage (interviews, production etc.).

SPECIFICATIONS

- » high color rendering index CRI>94
- » high values of fTLCI (Television Lighting Consistency Index) between 92 and 97
- » Color temperature: 3200 °K, 5600 °K or variable from 3200°K-5600°K
- » Light output: equivalent to about 1000W
- » Super lightweight compact and easy to handle (carbon fiber material, weight only 3.5 kg)
- » Power with battery or on mains
- » Heat-free
- » Fully dimmable from 0 to 100% without variation of color temperature
- » Flicker Free Technology
- » Temperature detection sensor LED
- » Built-in DMX control
- » Full power illumination with dedicated battery: 1,5h
- » Barn doors: 4 rotating included
- » DAYLED 1000 is also available with a pole operated yoke

 Fixed colors: 10°-60° DualColor: 15°-50°	 110W
 110W CCT COB LED, True colors'	 150 mm
 210 x 260 x 230 mm	 3,5 kg
