CDM LED PAR Tunable white

For shop and tradeshow lighting designers choice was just for CDM 3000k or 4200k - those times are past.

Now you are able to set your color temperature infinitely variable from 2700k - 6200k. The unit in classical PAR64 housing is extremely quiet. The single LED chip creates a beam angle of 60 degree.

The unit comes with a double yoke - so it can be used also as a floor version. The user friendly Blue LCD display allows a comfortable and easy handling.

Technical Data:

- » 2700-6200K
- » 3 DMX modes: 4ch, 3ch, 3ch
- » 4 modes of operation:
Auto-run, sound, DMX, Slave
- » ID programming
- » Blue LCD display
