

# Motorized Series

## Motorized Series

The new **MOTORIZED** models can be controlled via DMX or by a special gratis APP.

After manual and pole operated versions of our LED Fresnel series follows here now the Motorized models for operation in hard to reach areas to control PAN / TILT and also zoom.

The integrated motorlight system is made for PAN/TILT and focus operation after sight. The system is complete easy to fix at the rig in using the accessory bracket or TV adapter.

The system allows you a quick lighting from places which are difficult to access to.

You can control our motorized stirrups and additional modules directly without much effort via smart phone or tablet PC but also classical via DMX.
