

Monolith Cyc & Monolith Ground

– we sell emotions!

SquareLED Monolith Cyc & Monolith Ground

The SquareLED Monolith series are a range of LED based cyclorama spotlights. The light engine is based on 56 white High Power LED's for the white version and 14 High-Power LED for each Red, Green, Blue and White that allows full color tuning abilities for the RGBW version.

They are available in two housing versions: The Cyc is a hanging version that includes a steel bracket with the possibility to mount common clamps and couplers. The Ground version is specially designed for floor mount applications. Both models can be ordered in white or RGBW assembly.

The Monolith series offers the well known functions like conventional cyclorama spotlights: vertical lighting of curtains and suspensions; scattered backlight; asymmetrical soft light. That qualifies the Monolith series for professional usage in TV-studios and on stage.

The advantages are simple to figure out: low heat radiation; low long term costs caused by way longer bulb lifetimes and less power consumption.

Technical Data:

- » 14 High-Power LED's for each colour (Red, Green, Blue and White for the RGBW color tuning version)
- » 56 white High Power LED's (white version)
- » Floor mount or with hanging bracket
- » DMX 512 control (1Ch for white version; 5Ch for RGBW version)
- » Power consumption: 180 watts
- » Voltage Rating: AV 100-230V / 50Hz
- » Luminance: > 3.500 Lumen

Ground Version: 400 x 270 x 220 mm

8 kg

Cyc Version: 550 x 250 x 450 mm

8 kg
