54x3W RGBW IP-65

Active Zoom Outdoor

The SquareLED Active Zoom PAR is assembled with high-quality LEDs, which guarantee low consumption, high brightness, stable performance and long life.

The beam angle of 10° - 40° is possible by an electric zoom. The protection class IP-65 allows a permanent Outdoor use. Because of the built-in PWM each color has 16.666 dimming levels.

Over 16.7 million colors are possible by the RGB color mixing - because of the additional white LEDs even more color effects (such as pastel colors) are possible. Various strobe / dimmer modes are possible.

The LED Par Zoom features a built-in color calibration for color temperature output which can be set on the lamp. By an integrated temperature control, the lamp gets intelligently and reduces the output power to protect the LED from overheating.

Technical Data:

- » LED span: 50000-100000 hours
- » LED driver: PWM dimming frequency >400Hz(16666levels), Driving current:700mA
- » Consumption: 180W
- » Control Signal: DMX512/Auto run
- » Control mode: stand alone / master / slave
- » Channel: 4CH, 6CH, 8CH, 10CH
- » Color effect: R, G, B, W mixing
- » Function Effect:Dimmer, strobe, eotic, gradual change
- » Cooling mode: Natural Convection: built-in temperature controll function, intelligently controlling the power output of LEDs
- » Out voltage: DC32V
- » Anti-electricity intension: 1.5KV
- » Insulation Resistance >2MΩ

 10-40 °	 IP 65	 10 kg
