## Hi-Precision Fanless

Our new generation of LED Profile Spotlight is incredibly energy efficient; it features with an upgraded version of optical design based on our previous generation success and a newly adopted cooling design.

The Micro-Groove passive cooling technology adopted by our product outperforms other active fan cooling, water cooling, and heat-pipe cooling mechanisms in terms of temperature control and noise generation.

The new LED Profile Spotlight also uses 16-bit dimming mechanism, in which ensures higher precision and smoothness. Since the device is completely silent, use in noise-sensitive environments is uncompromising possible.

Gobos on printed foils can be produced quickly and easily by yourself and besides the low power consumption offers this feature another big savings in the daily use.

### Technical Data:

- » Voltage: AC110V/220V 60/50Hz
- » Power: 100W LED
- » Color temperature: 3200K or 6000K

 800 x 330 x 380 cm

 14,3 kg

 15°-30° und 25°-50°

 100 W
