

Squareled

UltraVisual - Advertising Signs

The super slim advertising signs of SquareLED Ultra- Visual series replace common T4/T5 tube Lightboxes by the latest LED technology.

The possibilities are enormous - in offices, supermarkets, restaurants, hotels, exhibition centers, shopping centers and of course in the home.

Slides with images, text and graphics can be replaced with a few adjustments quick and easy and the advertising signs are always kept up to date.

Interchangeable slides can be prepared simply by yourself or even be implemented by our graphics department - for this service please ask for an individual offer.

We use high-quality components such as light guide panel (LGP), edited by CNC 3D V-Cutting and Diamond Cutter and Ultra Bright SMD LEDs to ensure always a TOP quality. The small standard models in B6, A4 and A3 format are supplied as Table stand - larger standard models up to A1 are ready for wall mounting.
