

# DMX Demultiplexer

## Instruction Manual

Models:  
**DTA16**

version 1.0 since 21 May 2018

**ATTENTION!**

This instruction manual contains important information about the installation and the use of the equipment. Please read and follow these instructions carefully.

Always ensure that the power to the equipment is disconnected before opening the equipment or commencing any maintenance work.

## **General**

### ***IMPORTANT INSTRUCTIONS***

All safety and operating instructions should be read before the equipment is installed or operated.

### **IMPORTANT SAFETY INFORMATION**

The following general safety precautions have to be observed during all phases of operation, service, and the repair of this equipment. Failure to comply with these precautions or with specific warnings in this manual violates safety standards of design, manufacture, and the intended use of this equipment.

#### ***Do not operate in an explosive atmosphere!***

Do not operate this equipment in the presence of flammable gases or fumes. Operation of any electrical instrument in such an environment constitutes a definite safety hazard.

#### ***Water, moisture, heat and humidity***

Do not operate this equipment near water or in areas with wet floors or in high humidity atmosphere where condensation forms on the equipment. It should never be placed near or over a heat register or other source of heated air and it should not be installed or operated without proper ventilation.

#### ***Proper use***

Use only original adapter.  
Let the device adapt the environment for at least 10 minutes after unpacking.

#### ***Analogue output connection***

Analogue outputs (standard 0/+10V) are in a form of SUB-D socket.

## DMX input and output connections

Male and female DMX standard 3- or 5-pin XLR connectors are located on the front panel. DMX input is optically isolated.

## Device description

### Front panel:

1. DMX input
2. DMX output
3. Switch DMX start address (UP = ON)
  - #1-9 are allocated for DMX start address selection 1-256
  - #10 is TEST mode activation. In this mode, the outputs runs in sequence 1-16 automatically 0/+10V.
4. LED indication
  - POWER ON ON when device is powered
  - DMX OK ON when correct DMX is received
  - DMX OK BLINKING when test DIP is activated
  - DMX ERR ON when DMX with inversed polarity is detected

### Rear panel:

1. SUB-D output connector
2. Power supply

## Inputs and Outputs:

### Pin out of the XLR connectors:

Pin 1: Data CMN  
Pin 2: Data -  
Pin 3: Data +  
Pin 4, 5: Not connected

### Pin out for the SUB-D connector:

Pins 1-16 Channels 1-16  
Pins 19-25 Ground

## Technical data

### Power supply:

DC15V, 0.8A, external adapter

### Technical attributes:

- 16 channel DMX to analog 0/+10V converter
- Optically isolated input with true output
- LED indication of the DMX line
- DIP switch for setting of the DMX address
- Test function

### Input:

USITT DMX 512 [1990]

### Output:

16x analog output 0/+10V, max. 10mA per output

### Housing:

Steel housing with gray powder coating  
110 x 44 x 145 mm

### Weight:

0.6 kg

**DECLARATION OF CONFORMITY**  
**According to guidelines 89/336 EEC and 92/31 EEC:**

**Name of producer:** SRS Group s.r.o.

**Address of producer:** Rybnicna 36/D, SK- 83106 Bratislava, Slovak Republic

*Declares that the product*

**Name of product:** DTA16

**Type:** DTA16-3, DTA16-5, DTA16-C and their variants

*Corresponds to the following product specifications:*

**Safety:** EN60065, resp. EN 60950

**EMC:** EN55103-1, resp. EN55103-2
