# POST DOLLY - POPOPUP STAGE DOLLY

**IT'S NOT JUST A TRANSPORT DOLLY.  
IT'S PART OF THE STAGE LAYOUT.**

On the one hand it is a **simple but effective Dolly**.  
On the other hand the POST Dolly provides **various possibilities** to create different structures and layouts on stage.

## POSSIBILITIES ARE:

As a **Dolly for single lamps**.

As a **Stacked Dolly** with  
e.g. 1m standard conical tubes  
between the dollies,  
in order to create different  
levels. The components  
can be mounted standing  
or hanging on the 15 mm  
plate.

You can mount **duo, trio or quadro trusses** in the sizes 290 mm or 400 mm on the Dolly in different positions, with the help of the adapter plate.

The MLT<sup>2</sup> Trusses can be positioned **upright in center or off-center positions**.

Several POST Dollies can be combined to **create various constructions**.

## VERSATILE. FLEXIBLE. EASY TO HANDLE.

### Good to know:

The components remain on the POST Dolly during the show and transportation and therefore saves you a lot of time. The dimensions of the POST Dolly are 1200 x 600 mm. Special sizes are of course also possible. The wheels are black and grey and thus nearly invisible on stage.

**The Stacking Connector** is included and fits to many standard conical tubes.
