## Superpanel 30 Instructions

Mount the softbox on the Superpanel 30 models

To secure the softbox at the Superpanel 30 pass the velcro string at the edges of the panel and make sure to tighten it. (fig 1)

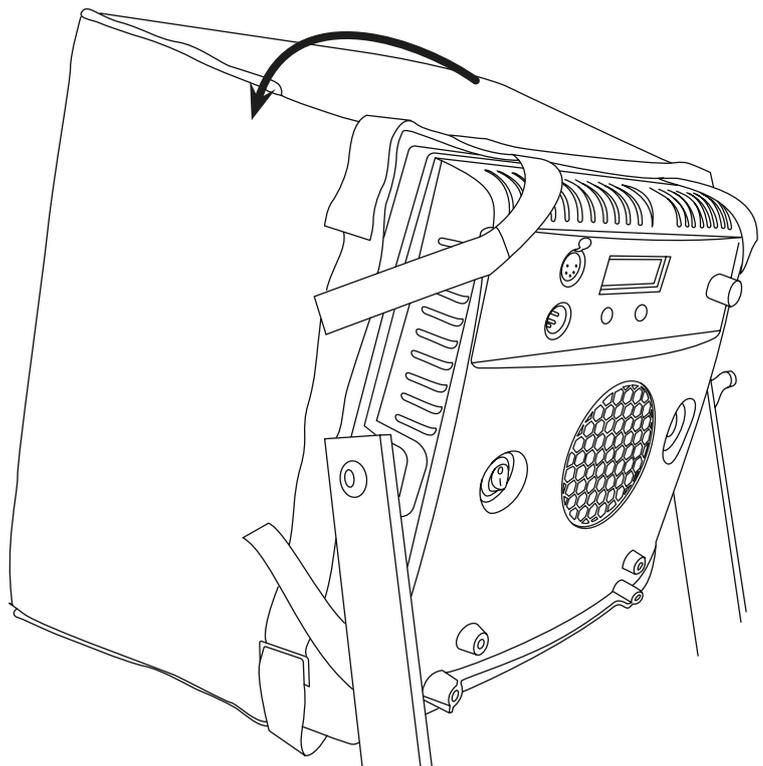

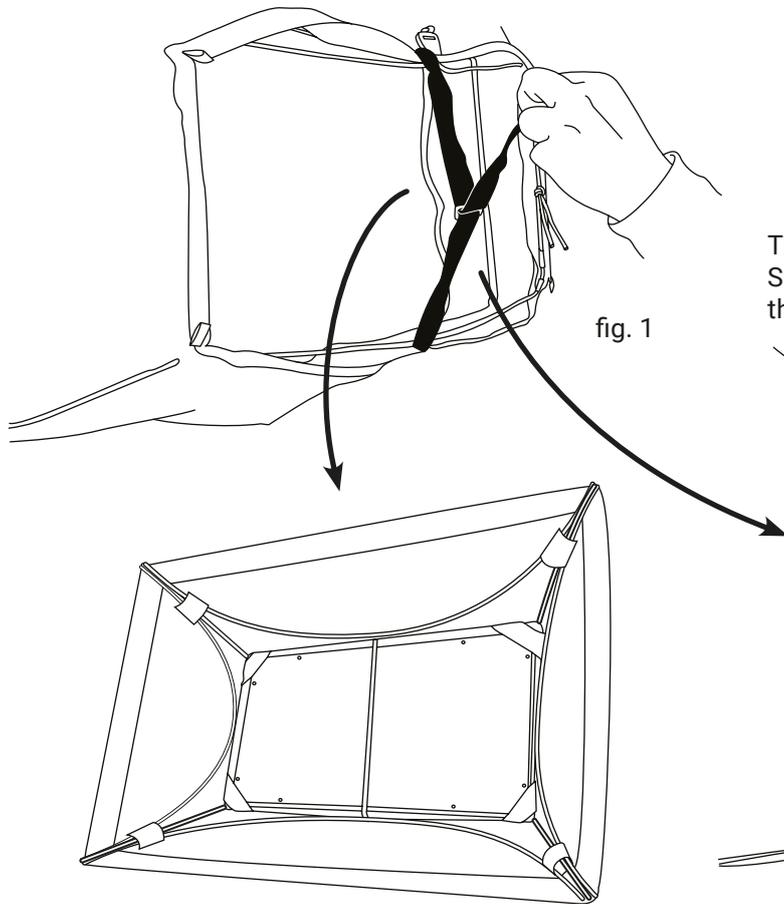

fig. 1

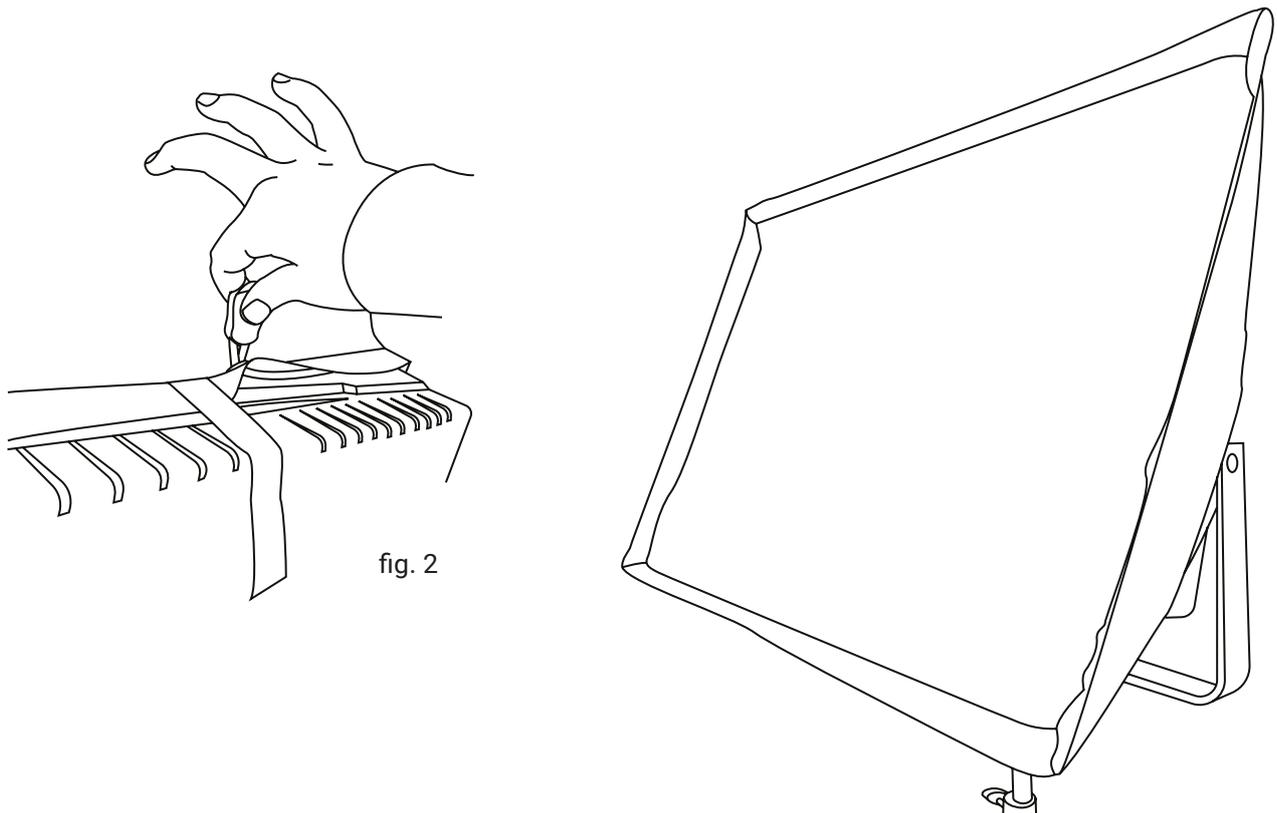

# Superpanel 60 Instructions

Install the softbox on the Superpanel 60 (fig.1)

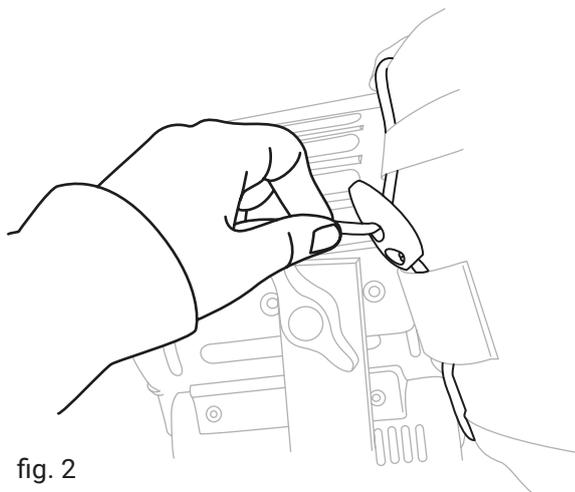

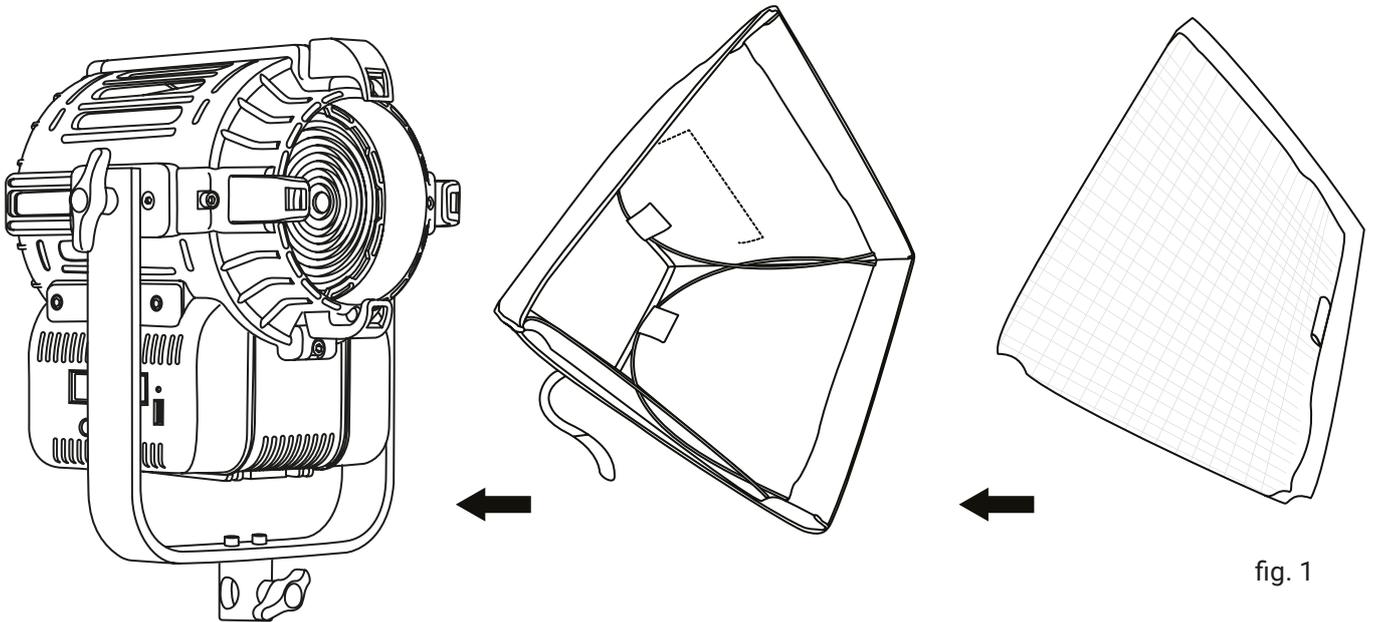

The black velcro string goes to the back of the Superpanel and the white elastic string goes to the front to fix tightly the softbox. (fig 1)

Tighten the elastic to close the gap between the softbox and the Dayled PRO until it's fixed (fig. 2).

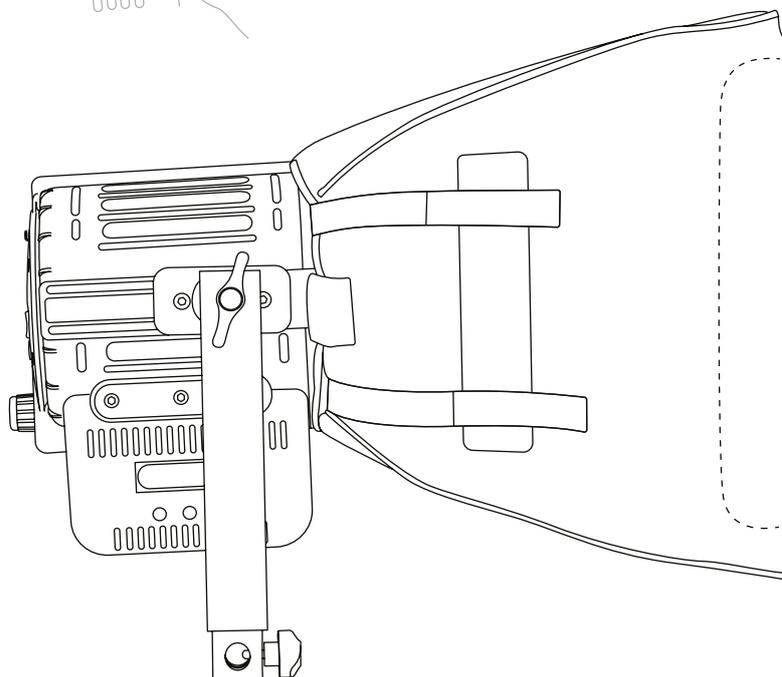

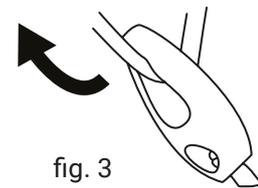

# Dayled 650 / 1000 Instructions

Install the softbox on the Dayled 650 PRO and Dayled 1000 PRO (fig.1)

Tighten the elastic to close the gap between the softbox and the Dayled PRO until it's fixed (fig. 2).  
To tighten the string pull it through the hole and hold it. (fig. 3)

## Dayled 2000 Instructions

Install the softbox on the Dayled 2000 PRO via the barndoors. (fig.1)

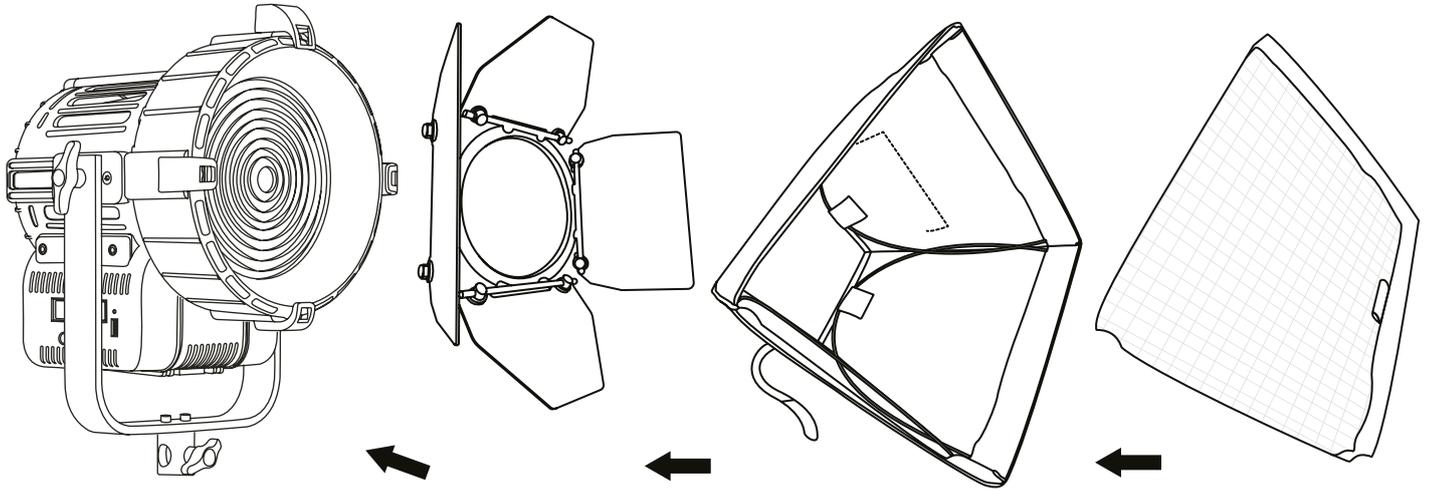

fig. 1

Pass the strings through the smaller barndoor and attached them on the velcro (fig.2)

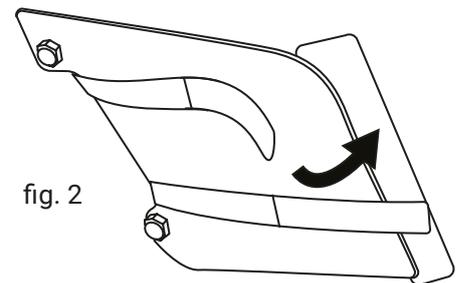

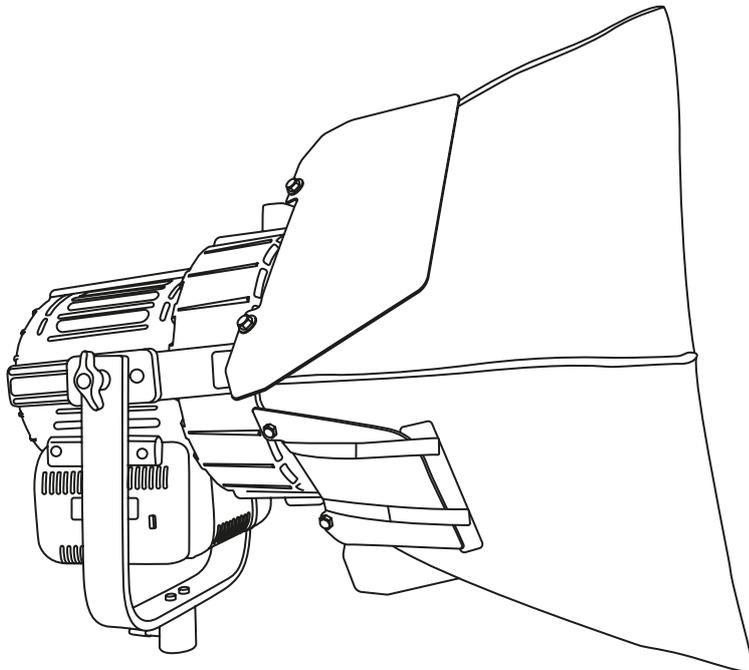

fig. 2

FULL and HALF diffuser are needed to expand differently the light and can be attached at the softbox through the velcro edges.
